

# Proshield® Vapour Barrier Film

Our Proshield® 5000 Series is made from prime polyethylene resin in full 6 and 10 mil gauge (150 um) stock sizes. Custom gauges are also available.

This is a special purpose construction film to be used as a long lasting vapour barrier within wall cavities. It is designed to exceed the criteria specified in CGSB Standard CAN/CGSB-51.34-M86.

Inteplast Group W. Ralston was one of the first Canadian manufacturers to be awarded CGSB certification on this product. We have more than 30 years manufacturing CGSB certified Vapour Barrier products.

## Features & Benefits

- True 6 mil gauge
- Exact weight and mil thickness
- Improved outdoor weather resistance to prevent premature damage from exposure to ultraviolet light
- Made from a quality virgin LLDPE blend
- Longer oxidative induction time protects against premature degradation
- Available in custom lengths and widths
- Specially packaged to inhibit UV damage
- Labels are provided for easy identification of size, both inside and outside the sleeve. All pallets are overwrapped
- Warehoused in two locations across the country

# Proshield® Vapour Barrier Film 5000 Series - CGSB Certified
