

INTEPLAST GROUP[®]
W. Ralston

Canada's Market Leader For Over 50 Years

One Source • One Order • One Delivery

WHO WE ARE

Our Story

We are now a part of the Inteplast Group, one of the largest manufacturers of Can Liners in North America.

Established in the 1960's, W. Ralston has become Canada's market leader in waste management solutions. Our dedication to Quality, Service, Consistency and Innovation has been our top priority since the beginning.

Our steady growth has allowed us to expand across Canada into two manufacturing facilities in Brampton Ontario and Drumheller Alberta. Along with three warehouse facilities, all locations ISO 9001:2015 certified, we continue to expand in order to support our growing North American customer base.

As we look toward the future, Ralston is committed to maintaining our market leadership position across the country. As in the past, we will continue to invest in our products, technological capabilities and service enhancements.

A RESPONSIBLE BUSINESS

Ralston and the Environment

Inteplast Group W. Ralston is committed to conducting our business in an environmentally responsible and proactive manner, consistent with our commitment to corporate citizenship, social responsibility and sustainability.

We aim to:

- Conserve natural resources.
- Minimize waste through source reduction and recycling.
- Handle and dispose of wastes through safe, environmentally responsible methods.
- Continue to respond to environmental requirements in the market place.
- Keep at the forefront to help find solutions to environmental concerns in the market.
- Strengthen our core belief that "less is more" – the thinner a product can be while still fulfilling its market use, the better the product is.
- Encourage our business partners and suppliers to strive for the same high levels of environmental performance.

We have helped create programs for environmental certifications such as Ecologo for recycling and Compostable bags for food waste.

We were the first in Canada to:

- Introduce linear low density resin
- Introduce anti-bacterial additives
- Obtain Ecologo certification using post-consumer film
- Introduce certified compostable bio-resins.

THE DIFFERENCE

Delivering Top Quality Products & Service

We take pride in ensuring our level of quality and consistency in each and every product we produce. Being “Canadian Made” means the world to our team of experienced and knowledgeable workforce that know what it takes to deliver top quality products and provide top notch service.

W. Ralston has introduced numerous innovative ‘FIRSTS’ to the industry. We were one of the first Canadian companies to manufacture linear low garbage bags, CGSB certified Vapour Barrier and BPI / BNQ Certified Compostable Bio-resin bags.

This philosophy continues today by providing great customer service, constantly expanding our offering, delivering innovative quality products while allowing our customers to sell into new markets.

OUR PRODUCTS

What We Offer

BIOSAK COMPOSTABLE BIN LINER

Ralston has been a pioneer in developing the new and growing market for certified compostable bioplastics in Canada.

In recognizing that the marketplace was demanding new solutions for solid waste disposal management, we were the first Canadian company to produce certified compostable bags.

All compostable products are certified by both Canada's BNQ certification program and by the Biodegradable Product Institute in the United States. Biosak meets all the requirements of ASTM D6400 and the BNQ 0017-088.
